

BCR[®] Ultra Glove Liners

Fortify•AM[®] and Fortify Sta•Cool[®] Polyester Glove Liners

BCR[®] Ultra Glove liners provide the next level of cleanroom hand health and operator comfort during regular and extended wear. They are engineered with Fortify•AM[®] * technology and Fortify Sta•Cool[®] ** technology. The glove liners are constructed with Fortify•AM[®] * technology that protects the fabric from microbial growth.

This microbe/fungi protection does not diminish with laundering and reuse. The Fortify Sta•Cool[®] ** technology provides the glove liners superior cool feeling and comfort. Because of the enhanced wicking function, contact discomfort associated with wearing latex, vinyl, nitrile, neoprene and other gloves is greatly reduced.

Features

- 100% continuous filament knitted polyester
- Medium weight glove liners
- Ambidextrous and color coded for easy stock control
- Half-finger versions for maximum dexterity and fingertip sensitivity
- Full-finger versions for more protection and temperature specific applications
- Steam autoclavable per your Standard Operating Procedure
- The glove liner is suitable in any ISO class cleanroom when worn under a nitrile, latex, vinyl, neoprene or other type glove

Technology

- Protection fibers inhibit microbial growth on glove liners*
- Advanced technology for extreme moisture management **
- Constructed using a special seamless technique, no-run and non-ravel, reducing potential contamination
- Manufactured for cleanroom applications

Results

- Reduced glove degradation over extended wear due to oils and sweat
- Long lasting freshness and cooling for operator
- Reduced odor caused by hand perspiration
- Provide microbial reduction and stay cool
- Designed for all day comfort
